

Saskatchewan is known for its abundance of natural resources and the industries surrounding them. One of those industries is Manufacturing.

Manufacturing is a vital industry in our province, making up **7% of GDP in 2018** and **employing 5% of our population**.

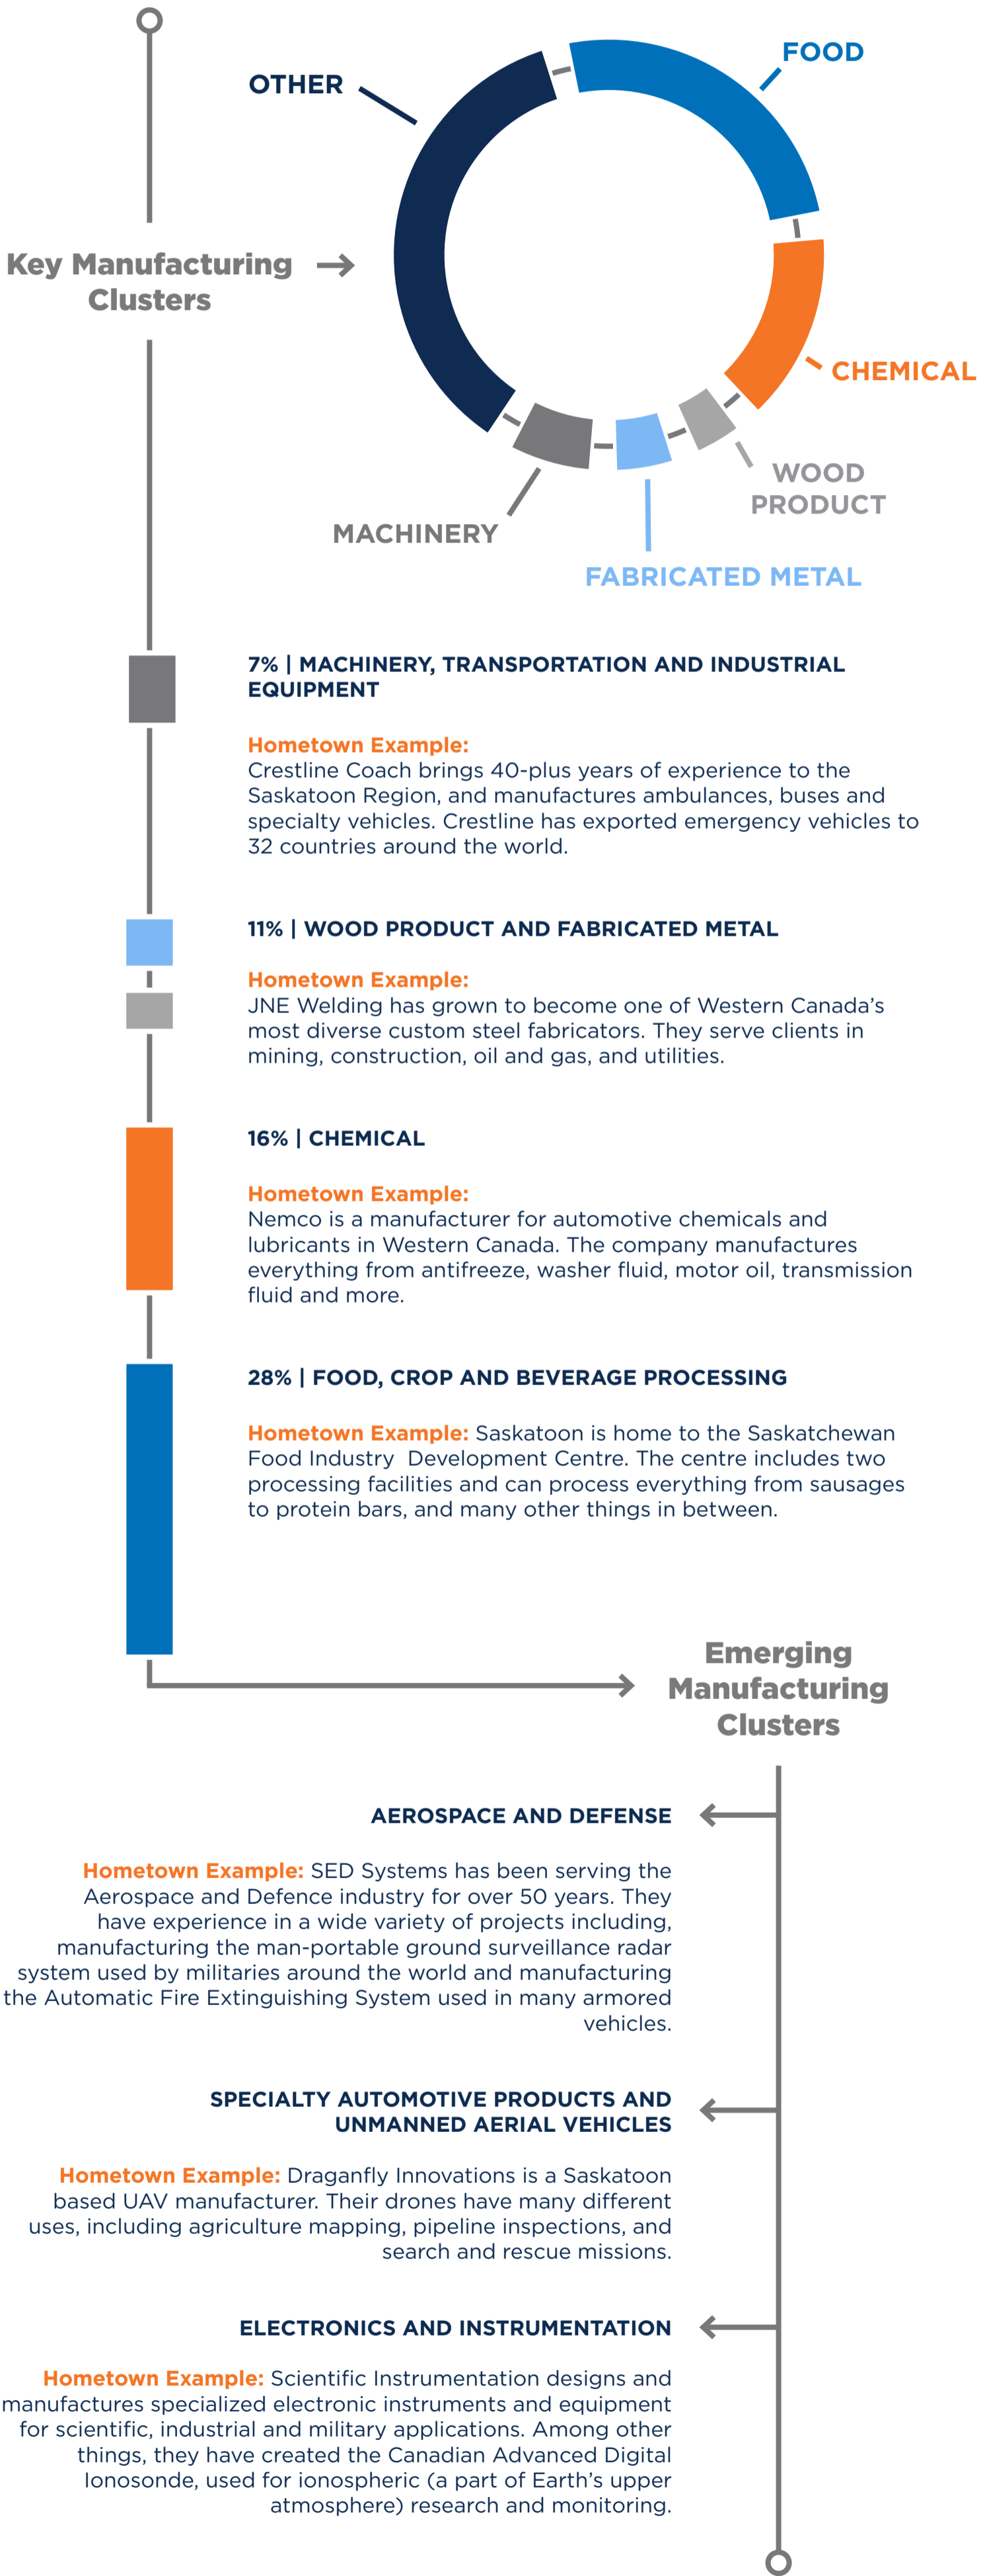

While the industry was affected by the 2015-16 oil price corrections, positive growth has been seen in both sales and employment in 2017 and 2018.

**Saskatchewan Manufacturing Sales and Employment**

■ Manufacturing Sales  
■ Manufacturing Employment

The industry is diverse, with a few larger clusters making up 60% of manufacturing sales, and a few emerging clusters starting to become more prominent.

Manufacturing is an important contributor to the Saskatchewan economy, and when you dig into it, our province's innovative manufacturers are leading the way for the industry.
